Summary

I'm a B.Tech student in my third year of studies in Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning. I have knowledge in Python (mainly ML algorithm implementation, pandas, numpy), C, and SQL. I'm a persistent and curious person finding different ways to solve problems. I find ways to coordinate with others and improve myself in a positive environment.

Education

GITAM University, Hyderabad

B.Tech in Computer Science Engineering with AIML
CGPA 9.89/10

Sept 2022 – Present
Hyderabad, India

St. Andrews School, Bowenpally

12th Grade with MPC + Computer Science
Percentage 94

Jun 2008 – Apr 2022
Hyderabad, India

Technical Skills

Languages: Python, Dart, HTML(basic), CSS(basic)

AIML tools: TensorFlow, scikit-learn, CNN, Data Augmentation, Image Processing

Libraries: NumPy, Matplotlib, scikit-image, Pandas, TensorFlow

Experience

GDGC - Google Developer Group on Campus

AUG 2023 – Present

AIML Developer

Oct 2024 – Present

- Used the basic knowledge I had about AIML to create a handwritten digit recognition project.
- We used TensorFlow features where we created our model using CNN.

Android Developer

Aug 2023 – Sept 2024

- Learnt about Android and made a simple Dice-Roll, Quiz app using Dart and Flutter.
- Coordinated effectively during Google Study Jams and helped guide people to finish the courses.

COGAAN Club

JUL 2023 – Present

Designing Member

- Learnt about HTML, CSS to make simple projects.

Projects

Image Preprocessing and Augmentation

Jan 2025

Python, NumPy, Matplotlib, scikit-image, TensorFlow

- Developed an image pre-processing pipeline to enhance and manipulate JPEG images using various techniques
- Implemented data augmentation methods such as shifting, flipping, rotation, brightness modification, and zooming
- Applied edge detection and smoothing filters like Prewitt, Laplacian, and Gaussian to extract meaningful features from images.

Recognition of Handwritten Digits

Oct 2024

Python, TensorFlow, HTML, CSS, JavaScript

- We used tensorflow to access the MNIST dataset for handwritten digits.
- Trained that dataset using a CNN model and achieved an accuracy of 99.37

Detection of Phishing websites

Oct 2023

Python, HTML, CSS, JavaScript

- A 24-hour Smart India Hackathon project. Utilized an online dataset of URL features to train models
- Used algorithms such as SVM, KNN, Linear Regression, and extracted data with Beautiful Soup with 96.5 Accuracy.
- Integrated the trained model into a website using Flask and JavaScript.

Quiz App

Jun 2024

Flutter and Dart

- The option button are displayed dynamically based of the number of options in database.
- The results screen gives a summary of chosen answer and correct answer where data is displayed dynamically.

Dice Roll App

May 2024

Flutter and Dart

- A simple App which rolls dice to generate a random dice image
- Learnt flutter basics, importing packages and creating Stateful and stateless widgets
- Learnt about classes, types of button and inserting images

Awards and Certification

- AIML Workshop - 2024 (TechXcelerate, IIT Hyderabad)
- Gen AI Study Jams Swags - 2024 (GDSC, GITAM, Hyderabad)
- Google Cloud Study Jams Swags - 2023 (GDSC, GITAM, Hyderabad)
- Valedictorian - 2022 (St. Andrews School)
- Cabinet Award - 2022 (St. Andrews School)

Extra-Curricular

Bharatversity, IIT TechXcelerate

Sept 2024

AIML Workshop, Hackathon

IIT Hyderabad

- Learnt about machine learning, the process and algorithms like linear regression, logistic regression, decision tree, XGBoost.
- Implemented basic algorithms.
- Made a project using these AI features and web development.

Smart India Hackathon

Oct 2023

AIML

GITAM, Hyderabad

- Applied Machine Learning classification models, including Decision Trees and Random Forests
- We trained models using SVM, KNN, and Linear Regression on a URL feature dataset.

School Cabinet

Jun 2021 – Apr 2022

Head Boy

St. Andrews School, Bowenpally

- Collaborated in organizing school events and assemblies under faculty supervision.
- Worked effectively in a team, supporting each other to achieve goals.
